TABBING STUDIOS · STEAM · MARCH 2027

Build your haven. Design the perfect killbox. Hold the line through 100 escalating raids.

ABOUT THE GAME

Raid Haven is a strategy, wave-based survival game focused on building fortified bases and defending against ever-more-powerful raids. Gear up your pawns with powerful weapons and armour, adapt your defences, and survive wave after wave of increasingly dangerous enemies.

Inspired by RimWorld's tactical pawn-based combat, it leaves out hunger, farms and production chains to focus on building, defending and surviving. Every tenth wave a lone Champion boss attacks, the dead stay dead, and the run ends when the last pawn falls.

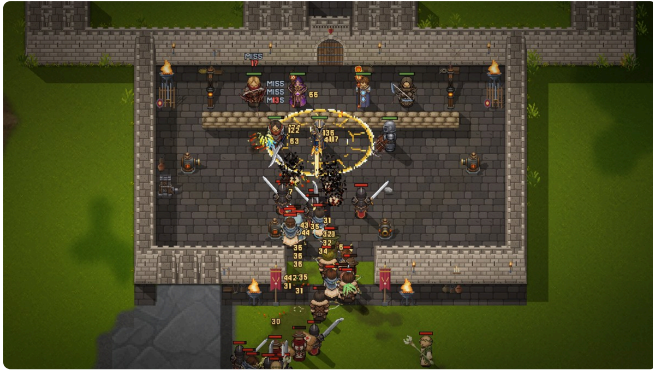

KEY FEATURES

- **Build your haven tile by tile** with 26 kinds of walls, gates, cover and defences.
- **Design the perfect killbox:** raiders take the open path, so you choose where they go.
- **Tactical real-time squad combat** with line of sight, cover, stances and formations.
- **A Champion boss every tenth wave**, with telegraphed abilities to read and survive.
- **Every raid needs a different plan:** Ogre Charge, The Fog, Bounty Hunters, Twinbound.
- **Loot, reforge and Legendary power** across weapons and armour in five rarities.

FACT SHEET

DEVELOPER	Tabbing Studios
PUBLISHER	Tabbing Studios

SCREENSHOTS

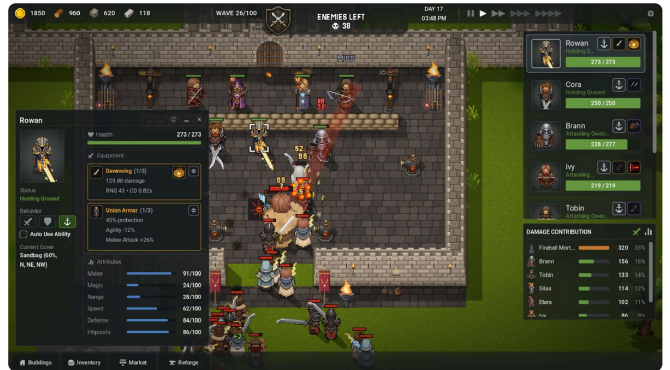

The killbox. The horde funnels through a narrow gap as the Legendary Lightbreaker sweeps the line.

Boss wave. A Champion attacks every tenth wave, here with Seismic Slam.

Ogre Charge. An Ogre telegraphs its charge lane at the sandbag line.

Mid-raid. Wave 26 of 100, with the pawn inspector and squad list.
